

CIMBRIA HEID

D Development, Production and Installation of Plants for Coffee Processing

From the Coffee Plant to the Roasted Bean

Coffee Processing Plant in Kenya

Everywhere in the world innumerable people enjoy a daily cup of coffee. However, it is a long way from the coffee plant to the roasted bean and those steps must be carefully planned and implemented. CIMBRIA HEID offers the necessary support.

As one of the oldest European manufacturers of production plants and machines for the processing of seeds and agricultural grain products, we can assist you in making your entire coffee production process more efficient and further enhance and improve the quality of your final product.

Regardless of whether it is a matter of supplying specific machines or of planning and installing turnkey production plants, CIMBRIA HEID offers ideal and customised solutions on a world-wide basis.

Following installation, we provide a comprehensive support service to ensure the trouble-free process of your production. As a member of the CIMBRIA Group, CIMBRIA HEID has a world-wide network of international partners who can offer continuous and expert assistance to customers and their production plants.

We have a fully equipped test centre with comprehensive laboratory facilities for industrial sized machines. This, together with our very long and extensive field experience, result in top quality performance capability in the research and on-going development of coffee processing technology and equipment.

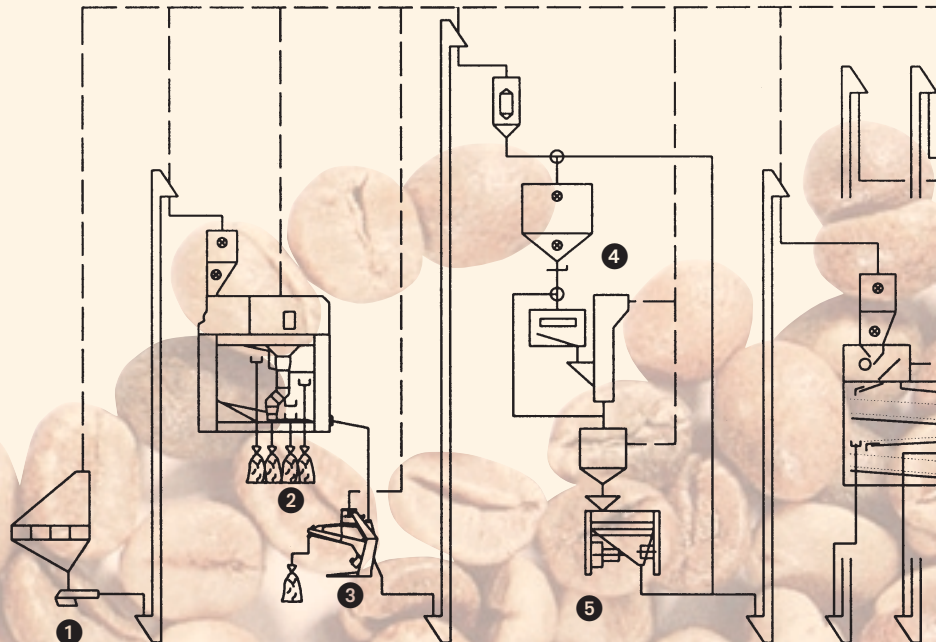

Our test facilities and experience enable us to provide specific and tailor-made solutions for every application.

From Single Machines to Turn-key Projects - all from a Single Source

CIMBRIA HEID design and manufacture machines and equipment to the highest engineering qualities and standards. These incorporate expertise in the most modern processing technology and plant design which ensure optimum processing of your coffee at low energy consumption. This guarantees that your plant and equipment will reflect the state of the art in performance efficiency and final product quality.

Production of Export Coffee (Arabica/Robusta)

- ① Reception
- ② Delta Precleaner
- ③ Dry Stoner
- ④ Huller
- ⑤ Polisher
- ⑥ Grader
- ⑦ Conveyor
- ⑧ Gravity Table Separator
- ⑨ Hand picking belts
- ⑩ Weighing and bagging off
- ⑪ Central Dust Collection Unit
- ⑫ Electrical Switch and Control Panel
